200-250 words

As a kid, I fell head over heels with the legendary «Harry Potter» book series, written by infamous J.K. Rowling. I was utterly in love with those books, which is understandable, due to their appeal to the younger audience.

The main plot is quite plain: the protagonist of the story, Harry Potter, through the course of the series, prevents an evil wizard Voldemort from rising to power. He is surrounded by a cast of charming characters, including his friends Ron and Hermione. And I was no less impressed by that story, no less. Although, I have never liked Harry all that much. Despite being a kind character, and always choosing the right thing, he seems boring. And his story of a suddenly abusive family has never been appealing to me.

But despite the meaningful legacy of the books, there are some criticisms to be had. Many of contemporary critics note on how the books handle the issues of activism and slavery. Personally, I also dislike how the whole house elf thing and how Hermione's activism was laughed at by the narrative. Also, J.K. Rowling herself is a bit of a controversial figure, which I really can't ignore. Though, overall, to be fair, the «Harry Potter» books still can be enjoyed by kids, despite the series' shortcomings. Every single book is a real page-turner, and the story of the boy who lived can help the younger generation, which isn't exactly known to enjoy reading, start reading more serious literature, as it once helped me.
